Subject: RE: SCM 600 machine update

Thank you for your latest update and your stated commitment to honor your obligation to finalize the purchase of the last 600 machines.

We will continue to work with you to find a mutually acceptable resolution.

In reading your latest response, there is no indication as to when you plan to have this account paid off.

It would be impossible to release the machines without a firm commitment.

An acceptable commitment would be make a further deposit and offer up security for the balance.

Then we could release the machines.

The balance owing is \$1,566,375.00.

As opposed to daily wires, I suggest you pay \$125,000.00 /week for the next 2 weeks (to be completed by June 18/18).

Regarding the security, I understand that there are some technical issues in regard to pledging shares. So for final Security, all we would ask is that the Parent Company sign a guarantee that these machines will be paid off no later than July 31/18.

We would hope to see weekly wires until paid off.

I feel that the above is easily doable.

- 1) we are only asking for a payment of \$250,000.00 (16% of the balance owing) to be paid within 2 weeks
- 2) we are extending the final terms an additional 60 days from today which is 100 days later than the original contract;
- 3) we are not requesting hard security, only a corporate guarantee from DWP
- 4) we will release the machines to improve your cash flow.

There should be no problem in you finding this new arrangement acceptable. We would like to get a draft of the guarantee today.

It's important to bring this to a head. The last thing we want to do is declare you in default of our contract.

We can not continue to leave payment of this contract open ended.

Subject: SCM 600 machine update

D. Magot
Exhibit 67

Tami L. Le, CSR 8716, RPR 1.20.23

Hello Willy,

I'm emailing to make it clear that SCM will honor our obligation to finalize the purchase of the last 600 machines. We however had a number of transactions occur recently, at the parent company level, related to acquisitions and growth. These transactions created unexpected delays and approvals that have delayed our ability to meet the original timeline/plan. With that said, we still will purchase the machines and will honor our obligation with you.

We appreciate your understanding and willingness to think creatively on a solution. The attorneys and the board are unable to approve new agreements or special arrangements so we are going to have to hold to our original plan to pay as soon as feasibly possible. The circumstances change daily so I'm unable to provide an exact date at this time but will continue to provide updates as they come. Your payment is a priority for us.

If you so choose, we would be willing to place the 600 machines in our Indiana location and pay you in BTC every week on what we mine. This would simply be a way to speed up the payment if you were interested in this as an option. I'm estimating for example that those 600 machines could mine approximately .4 BTC per day. At \$7,500 BTC that would be \$3,000 USD per day or \$21,000 USD per week. Our CFO has approved that we could transfer the roughly 2.8 BTC (.4 per day x 7 days) each week from our wallet to yours.

As you know, I wish I could have found a better solution but offer what I'm able to at this time.

Thank you,

Darren Magot
